

**Add-Ons are when you want to add extras to the product on offer – for instance, a plain card or with embellishments (this would be an Add-On)**

**In product settings menu – go to Add Ons and then click Add field**

**Choose how you would like the customer to see the add on in the product. i.e. multiple choice, check box, description etc – fill in appropriate boxed for your options and add the add-on cost. – You can either add more options or SAVE.**
